ENDURO STUDENT INDIA 2019

In Enduro Student India -2019, a competition for Engineering students held at Talegaon in Mawal it was great day for 'SIT' and 'SKNSITS'. It's story of co-operation and collaboration, skills and talents with the blend of hard work.

Mechanical engineering departments of 'SIT' and 'SKNSITS' extended hands of co-operation with each other came together, a group of 30 students was formed from both institutes, (that too students from rural background of agriculturist families) distributed work, planned accordingly. Design aspects were worked out on paper, search for spares was completed. Majority of assembling of the various parts was carried in the college workshops. The testing requirements included rough roads, the team selected hilly terrains nearby campus, prepared them still difficult and training of skilled driver to take on the adventurous rides.

All this took a span of one year. The four wheeler called ATV, all terrain vehicle was ready for tests of breaks, and other stringent standards of Enduro Student India. After green signal from them it was ready for participation in competition. It was yesterday Prof. NamdevGavade of 'SKNSITS', Prof.P.D. Kulkarni of 'SIT' received three awards : 1st prize in sprint, endurance and 2nd place in Dirtx. In fact 'Sprint' means in a set period of time during which specific work has to be completed, here it is race. 'Endurance' is the ability to endure difficult or an unpleasant process or situation without giving way. The endurance of ATV was tested for four hrs during competition. Dirt-X is Different from Directx (a collection of application programming interfaces (APIs) for handling tasks related to multimedia, especially game programming and video, on Microsoft platforms.) Here Dirt-X means strength of suspension and overall vehicle performance is tested on challenging track.

Certificate of Participation in BAJA SAEINDIA 2020

Baja SAE is an intercollegiate design competition run by the Society of Automotive Engineers (SAE). Teams of students from universities all over the world design and build small off-road cars. The cars all have engines of the same specifications.

The goal in Baja SAE racing is to design, build and race off-road vehicles that can withstand the harshest elements of rough terrain. The vehicles used in Baja SAE racing are often similar in appearance to dune buggies. Before 2007, the events were called "Mini Baja."

Our team of 24 members participated in SAE Baja 2016 in virtual round. We have cleared virtual round and selected for main Baja Event.

Our team rank is 63 out of 330.
