Brief Summary about Activity:

Aptitude tells about the mental stability and analytical skills of an individual. Someone who doesn't have the right skills for a position, or who isn't a good fit with the corporate culture, often ends up being replaced. Then companies fill the position again, and turnover costs and lost opportunities become significant. To make **better hiring decisions and avoid high job turnover rates, national & multi-national organizations use aptitude & ability testing.** Companies also use these tests for promoting and training. The goal is to get the right people, with the right skills, in the right jobs.
