Dear Author,

Thank you for your submission to 2017 40th International Conference on Telecommunications and Signal Processing (TSP), which will be held during July 5-7, 2017, in Barcelona, Spain. Below is a copy of the information submitted for your paper. Please mention the "Submission ID 222" in all future correspondence regarding this submission.

Thank you very much for your contribution.

With best regards,

Norbert Herencsar and Marcos Faundez-Zanuy
TSP 2017 General Co-Chairs

Topic(s): 03. Network Technologies

Keywords: Ad-hoc networks; MANET; Routing protocols; Wireless communication

Abstract: In this paper the performance analysis of a routing algorithm for MANETs called Service Zone Gateway Prediction (SZGP) is presented. This is a non-cooperative and hybrid type of routing with a hierarchical multilayered structure, incorporating pre-computed multipath hop-by-hop distributed connectivity. The goal is balance of the load among the nodes and reliable and energy efficient communication based on the formation of zones of service (ZS) and choice of nodes as Default Gateways (DG). A weight parameter that is function of the nominal available power and the transmission range of the nodes in the network is introduced. The routing is based on the formation of ZS in each network layer and choice of DG for each ZS considering this weight parameter. Simulation scenarios where the performance of the SZGP algorithm is compared to the well-known AODV routing are developed. The results show that the performance of SZGP related to parameters such as reporting ratio, packet delivery, delay and throughput are similar to those of AODV, but in relation to power efficiency the proposed algorithm outperforms the latter significantly.

Dear All,

We have submitted the paper for review.

Attached the PDF file.

Let us keep the finger crossed for the acceptance.

Best Regards

Respected sir,

Thank you very much.

I will prepare draft for thesis chapter based on this paper.

simultaneously thesis work is in progress.
very soon I will send draft of thesis chapters I have prepare till today for review and comments.
Thank you with regards.

Title : Characterization for Reporting Rate of Adaptive Sectoring Scheme to Improve Reliability in WSN.

Dear Sir,

With reference to above, we presented the paper in above conference at hydrabad.

We have sent copyright form to TPC2015 to submit paper at IEEE explorer.

Kindly find the attachment for Paper, Copyright form and certificate.

But we could not see the paper at IEEE explorer.

We have included this paper in PhD thesis, and defense is on 9 October 2017 at TUS, Bulgaria.

What we can do on earliest?

Should we modify and submit at suitable conference ? with out any complications.

Please kindly suggest.

Looking forward your reply.

Thank you with best regards.

Manohar

TSP17_Results for Topology and Mobility_Manohar .

8 messages

Manohar Chaudhari <mschaudhari20@gmail.com>

Wed, Jan 25, 2017 at 3:33 PM

To: Vladimir Poulkov <vkp@tu-sofia.bg>

Cc: Polly Koleva <p_koleva@tu-sofia.bg>

Respected Sir,

Respected Madam,

Please kindly find the results in excel sheet for all graph of QOS parameters by varying Mobility and Topology.

Details of same with brief explanation is mentioned in topology_experimentation_details.doc file attached here. Few screenshots of simulation is also attached for your kind reference.

Regarding node density experimentation should we go for following combinations?

Kindly suggest.

| Topology | Node Density | Mobility2 | Mobility3 |
|-----------|--------------|-----------|-----------|
| Grid | 50 | 5m/sec | 10m/sec |
| Random | 50 | 5m/sec | 10m/sec |
| Horizotal | 50 | 5m/sec | 10m/sec |
| | | | |
| Grid | 100 | 5m/sec | 10m/sec |
| Random | 100 | 5m/sec | 10m/sec |
| Horizotal | 100 | 5m/sec | 10m/sec |
| | | | |
| Grid | 150 | 5m/sec | 10m/sec |
| Random | 150 | 5m/sec | 10m/sec |
| Horizotal | 150 | 5m/sec | 10m/sec |
| | | | |
| Grid | 200 | 5m/sec | 10m/sec |
| Random | 200 | 5m/sec | 10m/sec |
| Horizotal | 200 | 5m/sec | 10m/sec |

There are too many combinations can be possible.

As per my understanding I perform few combinations for TSP Performance analysis.

If any other combination for experimentation you would like to suggest, please suggest? We will try to do accordingly.

Regarding paper contents and objective please kindly guide me. we will prepare accordingly.

Thank you with warm regards.

--

Dear Manohar,

In the attached file (you have send us) there are only screenshots regarding chain and grid topology (Fig.1 and Fig.2).

Could you send us a screenshot of random topology, as we would like to put screenshots of all three topologies in the paper?

Best Regards

Dear Manohar,

We are currently in the process of uploading the paper to be submitted for the Springer Journal.

For the upload to be completed, the system requires a short CV of the authors (no more than 1/3 page).

Please urgently send me your short CV so that we can upload the paper successfully as the deadline for submission is tomorrow.

Sorry, for this inconvenience, but we were not aware of this requirement regarding the submission.

Attached is are some CVs for your information. You can use them as templates. If you do not have a photo currently available we will include it in your CV after the revision if accepted.

When ready we will send you're a copy of the paper submission.

Expecting your soonest reply.
