Department of Computer Engineering

ACADEMIC YEAR 2021-22

Vision and Mission of Institute

VISION

उत्तमपुरुषान् उत्तमाभियंतृन् निर्मातुं कटीबध्दाः वयम्।

We are committed to produce not only good engineers but good human beings, also.

MISSION

- We believe in and work for the holistic development of students and teachers.
- We strive to achieve this by imbibing a unique value system, transparent work culture, excellent academic and physical environment conducive to learning, creativity and technology transfer.

Vision and Mission of Department

VISION

Computer engineering department in association with user industry will harness knowledge and potential for application based product development in future, through world-class education to empower the society around.

MISSION

Computer Engineering department will be the widely recognized center of excellence for promoting value added engineering education. We will contribute by evolving innovative technology solutions to solve a wide range of complex scientific, technological and social problems.

SHORT TERM GOALS

- To continuously upgrade existing resources through qualified and experienced faculty and state-of-the-art laboratories.
- To initiate relevant value addition programs and certifications for improving employability.
- To strengthen the Institute-Industry relationship for mutual benefit.
-

LONG TERM GOALS

- To establish a center of innovations in Agriculture, Tele-health and ICT sector in collaboration with Industry.
- To create center of excellence in network, security and computer vision.
- To establish a world class R&D institute for patent based research creating opportunities for faculty to be resource persons.

Department of Computer Engineering

PROGRAM EDUCATIONAL OBJECTIVES

- 1) To prepare globally competent graduates having strong fundamentals and domain knowledge to provide effective solutions for engineering problems.
- 2) To prepare the graduates to work as a committed professionals with strong professional ethics and values, sense of responsibilities, understanding of legal, safety, health, societal, cultural and environmental issues.
- 3) To prepare committed and motivated graduates with research attitude, lifelong learning, investigative approach, and multidisciplinary thinking.
- 4) To prepare the graduates with strong managerial and communication skills to work effectively as individual as well as in teams.

PROGRAM OUTCOMES

Students are expected to know and be able –

- 1) To apply knowledge of mathematics, science, engineering fundamentals, problem solving skills, algorithmic analysis and mathematical modeling to the solution of complex engineering problems.
- 2) To analyze the problem by finding its domain and applying domain specific skills
- 3) To understand the design issues of the product/software and develop effective solutions with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- 4) To find solutions of complex problems by conducting investigations applying suitable techniques.
- 5) To adapt the usage of modern tools and recent software.
- 6) To contribute towards the society by understanding the impact of Engineering on global aspect.
- 7) To understand environment issues and design a sustainable system.
- 8) To understand and follow professional ethics.
- 9) To function effectively as an individual and as member or leader in diverse teams and interdisciplinary settings.
- 10) To demonstrate effective communication at various levels.
- 11) To apply the knowledge of Computer Engineering for development of projects, and its finance and management.
- 12) To keep in touch with current technologies and inculcate the practice of lifelong learning

PROGRAM SPECIFIC OUTCOMES (PSO)

A graduate of the Computer Engineering Program will demonstrate-

PSO1: Professional Skills-The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying.

PSO2: Problem-Solving Skills- The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.

PSO3: Successful Career and Entrepreneurship- The ability to employ modern computer languages, environments, and platforms in creating innovative career paths to be an entrepreneur, and a zest for higher studies.
